In 2013, Research Enhancement Strategy Office was established in each research institute in NINS by support of the MEXT University Research Enhancement Project of 10 years 2013 to 2023. In this office, university research administrators (URA) and supporting staff members realize several

strategic plans for the enhancement of international and inter-university collaborations, public relations, and research activities of young, female, and foreign scientists in collaboration with Head Office in NINS.

All technical staff at IMS belong to the Technical and Engineering Department (TED). IMS offers collaborators a unique array of support services. A group of engineers and technicians technically support not only scientists outside from IMS but also inhouse scientists.

The technical division of IMS (TD-IMS) was initially organized in 1975 as the first organization of technical staff in Japan to support both in-house and outside scientists technically. Over time, the number of personnel with high levels of technical skills in TD-IMS increased dramatically, and the division outgrew its organization system. Consequently, the TD-IMS has been reorganized as the “Technical and Engineering Department” since April 1st 2021.

The TED operates directly under the director general of IMS, and consists of four Units (Optical Engineering Unit, Computing and Information Technology Unit, Equipment

Development Unit, and Instrumental Analysis Unit), as well as staff members taking charge of safety, facilities, and publicity activities. Each unit has a unit leader, who manages the unit staff.

In addition, several members belonging to the TED support administrative activities in IMS by managing the Safety Office, the Public Affairs Office, the Archives, and the Information Office.

The annual meeting for technical staff of research institutes and universities in Japan, was organized in 1975 and since then it has been regularly held every year. We aim toward higher technology and knowledge exchange concerning various technical subjects related to our technology and engineering. Our best endeavors have been, and will be made, to promote the advanced research of IMS.
