

## Theoretical and Computational Molecular Science

H. OKUMURA, “Molecular Dynamics Simulation of Amyloid-fibril Disruption by an Infrared Free-electron Laser,” *J. Jpn. Laser Processing Soc.*, **29**(3), 160–165 (2022). (in Japanese)

S. G. ITOH, M. YAGI-UTSUMI, K. KATO and H. OKUMURA, “Molecular Simulation on the Early Aggregation Process of Amyloid- $\beta$  Peptides,” *The Cell*, **55**(10), 784–788 (2023). (in Japanese)

S. J. CHEN, M. HASSAN, R. L. JERNIGAN, K. JIA, D. KIHARA, A. KLOCZKOWSKI, S. KOTELNIKOV, D. KOZAKOV, J. LIANG, A. LIWO, S. MATYSIAK, J. MELLER, C. MICHELETTI, J. C. MITCHELL, S. MONDAL, R. NUSSINOV, K. OKAZAKI, D. PADHORN, J. SKOLNICK, T. R. SOSNICK, G. STAN, I. VAKSER, X. ZOU and G. D. ROSE, “Protein Folds vs. Protein Folding: Differing Questions, Different Challenges,” *Proc. Natl. Acad. Sci. U. S. A.* **120**(1), e2214423119 (2023). DOI: 10.1073/pnas.2214423119

## Photo-Molecular Science

M. NAGASAKA, “Intermolecular Interactions in Liquids Revealed by Soft X-Ray Absorption Spectroscopy,” *J. JSSRR*, **36**(4), 176–184 (2023). (in Japanese)

## Materials Molecular Science

T. YOKOYAMA, “World’s First Photoelectron Spectroscopy under Atmospheric Pressure and Tracking of Sulfur Poisoning Process of Fuel Cells,” *SPRING-8 pamphlet 2023* (2023). (in Japanese)

M. HIRAMOTO, “An Opinion on Energy Problem,” *Crystal Letters*, **83**, 45–46 (2022). (in Japanese)

M. HIRAMOTO, *Organic Photocurrent Multiplication, in the Series of Electronic Materials: Science & Technology*, Springer Nature Singapore Pte Ltd. (2023). ISBN: 978-981-99-1236-0, ISBN: 978-981-99-1237-7 (eBook), DOI: 10.1007/978-981-99-1237-7

## Life and Coordination-Complex Molecular Science

K. KATO and S. YANAKA, “Antibody Effector Functions and Functional Improvement of Antibodies via Their Constant Regions,” *Jikkenigaku*, **40**(20), 3253–3258 (2022). (in Japanese)

M. YAGI-UTSUMI and K. KATO, “Towards Understanding the Molecular Mechanisms of Anhydrobiosis in Tardigrades, ‘the Strongest Organisms on Earth,’” *J. Jpn. Biochem. Soc.*, **94**(6), 888–891 (2022). DOI: 10.14952/SEIKAGAKU.2022.940888 (in Japanese)

K. KATO and H. YAGI, “Current Status and Challenges in Structural Glycobiology,” *Trends in Carbohydrate Research*, **15**, 38–46 (2023).

S. YANAKA and K. KATO, “Molecular Basis of the Working Mechanisms of Therapeutic Antibodies,” *Seibutsu-kogaku Kaishi*, **101**, 347–349 (2023). DOI: 10.34565/seibutsukogaku.101.7\_347 (in Japanese)

Y. YUNOKI, A. MATSUMOTO, K. MORISHIMA, A. MARTEL, L. PORCAR, N. SATO, R. YOGO, T. TOMINAGA, M. YAGI-UTSUMI, R. INOUE, H. KONO, H. YAGI, K. KATO and M. SUGIYAMA, “The Advantage of Small-Angle Neutron Scattering Revealed through Analyzing the Overall Structure of a Fully Assembled Complex in Circadian Clock,” *J. Jpn. Soc. Neutron Science (Hamon)*, **40**, 3253–3258 (2023). (in Japanese)

S. G. ITOH, M. YAGI-UTSUMI, K. KATO and H. OKUMURA, “Molecular Simulation on the Early Aggregation Process of Amyloid- $\beta$  Peptides,” *The Cell*, **55**(10), 784–788 (2023). (in Japanese)

N. MOMIYAMA, “Design of Molecular Catalyst Based on Three-Center Four-Electron Halogen Bond,” *Pharmaceutical Soc. Jpn. (FARUMASHIA)*, **58**(10), 948 (2022). (in Japanese)

Y. SEGAWA, “Nonplanar Aromatic Hydrocarbons: Design and Synthesis of Highly Strained Structures,” *Bull. Chem. Soc. Jpn.* **95**(11), 1600–1610 (2022). DOI: 10.1246/bcsj.20220270

Y. SEGAWA, M. NAGASE, Y. SAITO, K. KATO and K. ITAMI, “C–H Borylation of Arenes: Steric-Controlled Para-Selectivity and Application to Molecular Nanocarbons,” *Yuki Gosei Kagaku Kyokaiishi (J. Synthetic Org. Chem.)*, **80**(11), 994–999 (2022). DOI: 10.5059/yukigoseikyokaiishi.80.994

# LIST OF REVIEW ARTICLES AND TEXTBOOKS

---

## Research Center of Integrative Molecular Systems

**Y. FURUIKE**, “Oscillation Mechanism of Clock Protein KaiC Revealed by Synchrotron X-Ray Crystallography,” *SPring-8/SACLA Information*, **27(4)**, 306–310 (2022). (in Japanese)

**Y. FURUIKE**, “Circadian Rhythm is Orchestrated by Allosteric in Clock Proteins,” *Seibutsu Butsuri*, **63(3)**, 173–174 (2023). (in Japanese)

**Y. FURUIKE**, “Searching for Origin of Circadian Rhythm in Crystals of Clock Protein KaiC,” *Nihon Kessho Gakkaishi*, **65(2)**, 113–121 (2023). (in Japanese)

**Y. FURUIKE, A. MUKAIYAMA and S. AKIYAMA**, “Master Allosteric in Clock Protein KaiC Orchestrates Circadian Rhythm,” *SPring-8/SACLA Research Frontiers 2022*, 26–27 (2023).

**H. KURAMOCHI and T. TAHARA**, “Mapping Ultrafast Structural Dynamics in Photochemistry with Femtosecond Time-Resolved Time-Domain Raman Spectroscopy,” *Photochemistry*, **53(3)**, 132–137 (2022). (in Japanese)

**Y. YONEDA**, “Complex Dynamics of Photosystem II Elucidated by Advanced Nonlinear Spectroscopy,” *Seibutsu Butsuri*, **63(3)**, 171 (2023). DOI: 10.2142/biophys.63.171 (in Japanese)

**J. KISHINE, H. KUSUNOSE and H. M. YAMAMOTO**, “On the Definition of Chirality and Enantioselective Fields,” *Isr. J. Chem.* **62(11-12)**, e202200049 (2022). DOI: 10.1002/ijch.202200049

**T. KOSUGI**, “Future Perspectives by Protein Design Technology,” *Gendai Kagaku (CHEMISTRY TODAY)*, No. **622**, pp. 34–36 (2022). (in Japanese)

## Division of Advanced Molecular Science

**Y. OHTSUBO, S. KIMURA and F. IGA**, “Recent Progress in Clean-Surface Formation of Topological Kondo Insulators and Topological Surface States Observed There,” *Electron. Struct.* **4(3)**, 033003 (2022). DOI: 10.1088/2516-1075/ac8631
