

The IMS campus covering 62,343 m<sup>2</sup> is situated on a low hill in the midst of Okazaki city. The inequality in the surface of the location, the hill and growing trees are preserved as much as possible, and low-storied buildings are adopted for conservation of the environment. The buildings of IMS are separated according to their functions as shown in the map below. The Research Office Building and all Research Facilities, except for the Computer Center, are linked organically to the Main Laboratory Buildings by corridors. The computer Center, Library and Administration Buildings are situated between IMS and neighboring National Institute for Basic Biology and National Institute for Physiological Sciences, since the latter two facilities are for common use amongst these three institutes.

The lodging facility of IMS called Mishima Lodge, located within four minutes' walk east of IMS can accommodate 74 guests and 20 families. Scientists visiting IMS, as well as the two other institutes, can make use of these facilities. Foreign visiting scientists can also live in this lodging with their families during their stays. The Okazaki Conference Center, with four conference rooms capable of attendance between 50~250, was built in April, 1997 in the Mishima area. The two buildings, Center for Integrative Bioscience, and Research Center for Computational Science, and research facilities of ONRI were built in February, 2002 in the Yamate Area. Four other buildings were also built in March, 2004 in the Yamate Area.
